Sigler Companies is the first Iowa printer to achieve three of the printing industry's most sought-after recognitions: MasterPrinter, FSC certification, and SFI certification. The most recent certifications recognizing Sigler as a "green" printer were awarded by the Forest Stewardship Council and the Sustainable Forestry Initiative, the two certifying organizations that set the standards for responsible forest use, management, and sustainability.

The certifications come after a rigorous documentation and audit process conducted at Sigler's new printing facility at 3100 South Riverside Drive in Ames.
